Vaishnavi Agatkar

Data Analyst

Pune, India +91-8657375649 vaishnavirao4197@gmail.com Vaishnavi Agatkar

Professional Summary

Data Analyst professional with strong analytical and problem-solving skills, proficient in **Excel, SQL, Python, and Power BI** for data cleaning, analysis, and visualization. Experienced in exploratory data analysis, query optimization, and building interactive dashboards to transform raw data into actionable insights.

Key Skills

Data Analysis & Programming: Python (Pandas, NumPy, Matplotlib, Seaborn), EDA, Statistical Analysis, Insight Generation
Database Management & Querying: SQL, MySQL, Joins, Aggregations, Subqueries, Windows Function & Cte's
Business Intelligence & Reporting: Power BI, Excel Dashboard
Soft Skills & Tools: Analytical Thinking, Problem Solving, Attention to Detail, Data Storytelling, Communication & Presentation Skills

Projects

Meal Plan Analysis | *Python* **Feb 2026**

- Cleaned and analyzed meal and glucose data using **Pandas/NumPy** to evaluate impact of nutrients, timing, and demographics on blood sugar levels.
- Visualized glucose and dietary patterns using **Matplotlib/Seaborn**, highlighting meal wise trends and time based spikes.
- Discovered key drivers of glucose variation **(e.g., high carb meals, irregular timing)**, enabling data driven meal planning for better glycemic control.

E-Commerce Data Analysis | *SQL* **Feb 2026**

- **Built SQL analytics solution for an e-commerce platform** to evaluate customer behavior, product performance, sales trends, and inventory optimization.
- **Applied advanced SQL (joins, CTEs, window functions) to analyze orders** enabling customer segmentation, MoM revenue/AOV tracking, and category level demand insights.
- Identified top markets, high revenue products **(2–3x)**, fast moving SKUs, and low engagement items **(<40% reach)**, driving data backed decisions in marketing and inventory optimization.

Global E-Commerce Sales & Performance Analytics Dashboard | *Power BI* **Jan 2026**

- Designed a **Power BI dashboard** to analyze e-commerce sales across 14 countries, segments, & channels.
- Transformed and modeled data using DAX to track KPIs like revenue, trends, and target vs achievement.
- Identified top markets, high-value segments, and underperforming teams to drive data-driven sales decisions.

India CPI Inflation | *Advanced Excel* **Jan 2026**

- **Built CPI Inflation dashboard** analyzing category contribution, YoY trends, MoM food inflation, COVID-19 impact, and crude oil influence.
- **Processed CPI data by handling 5–8% missing values**, grouping 8+ categories, and applying time series, and correlation analysis using Excel (pivots, advanced charts)
- Spotted key insights including Food as top contributor **(35–40%)**, peak inflation **(7.4%)**, post COVID volatility, and strong oil correlations **(Transport 0.77, Food 0.72)**, enabling clear visibility into inflation drivers.

Experience

Infosys Limited **Feb 2021 – Mar 2026**

Technology Analyst *Pune, Maharashtra*

- **Optimized Oracle data architecture** (schemas, roles, DB links, synonyms) to enable secure, scalable, and analytics-ready data access.
- **Enhanced data models** by introducing lifecycle status dimension improving data structure and enabling more effective reporting and analysis.
- **Refactored SQL based data extraction** by externalizing queries, reducing deployment effort by 70% and improving flexibility.
- **Performed deep database analysis** and dependency mapping, ensuring zero data loss during system decommissioning.
- Applied data validation and debugging techniques to resolve data quality issues, improving reliability for downstream analytics.

Education

Government College of Engineering, Aurangabad **2016 – 2020**

BE in Electrical and Electronics Engineering *CGPA: 9.17*

Certifications

Coding Ninjas **2025 – 2026**

Data Analytics *Certificates Link*
